Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

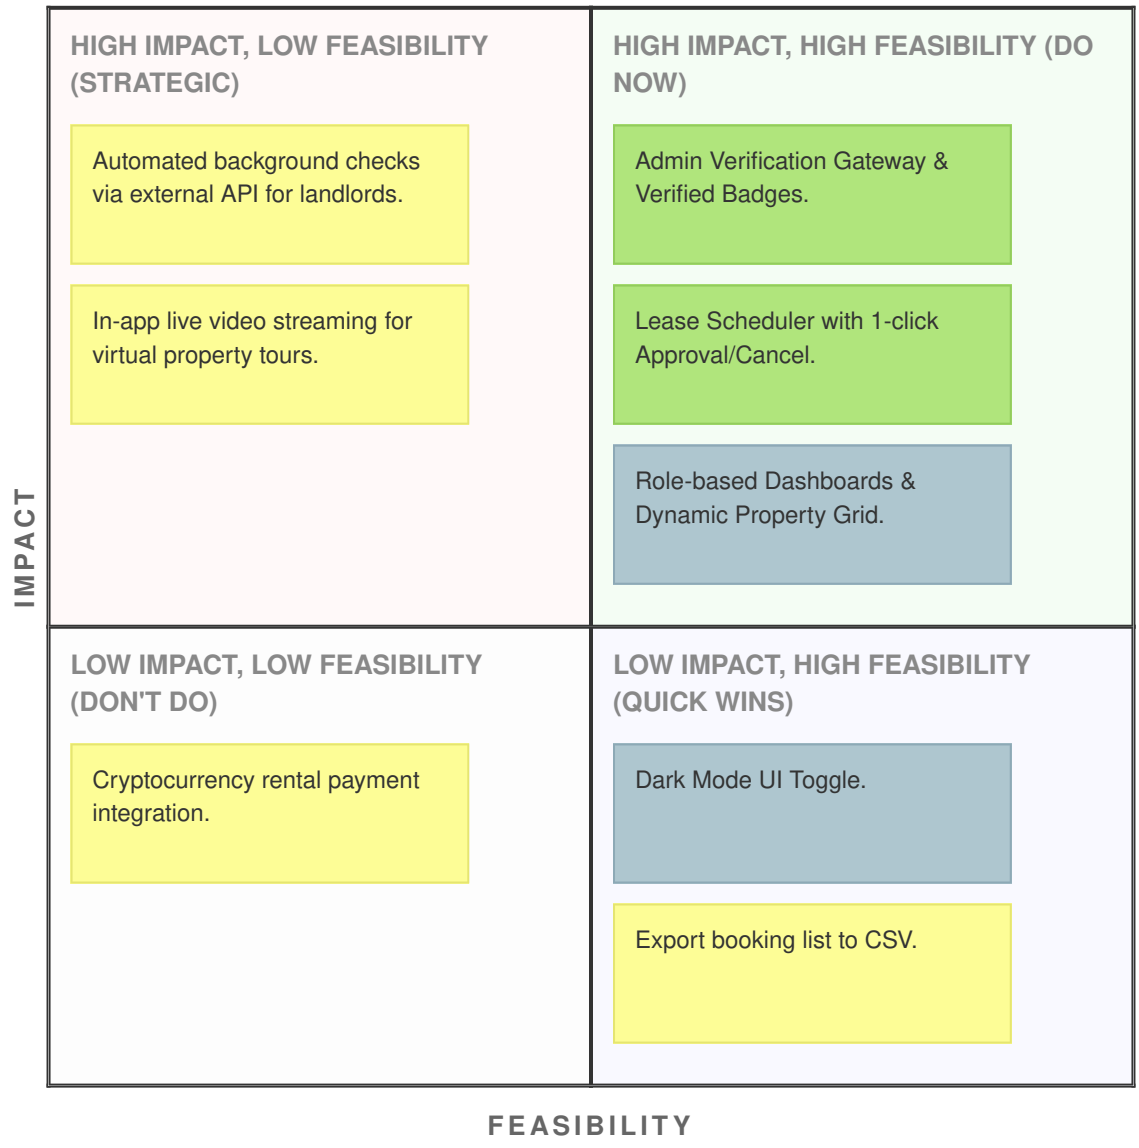
Define your problem statement: What problem are you trying to solve? Frame your problem as a "How Might We" statement. This will be the focus of your brainstorm.

"How might we bridge the gap between prospective tenants and verified landlords to facilitate secure property discovery and seamless physical tour scheduling without manual back-and-forth?"

Step-2: Brainstorm, Idea Listing and Grouping

Write down any ideas that come to mind that address your problem statement. Group them into thematic categories.

Theme: Trust & Security	Theme: Booking Coordination	Theme: UI & Discovery
Admin gateway to manually approve all new landlord accounts.	Inline scheduler allowing renters to pick a visit date instantly.	Dynamic Explorer Grid with active property filtering (rent, type).
Display a "Verified" badge on properties listed by approved owners.	1-click "Approve" or "Cancel" buttons for owners on tour requests.	Role-based dashboards (different UI for Renters, Owners, Admins).
Use JWT Tokens for stateful session security.	Real-time status tracking dashboard (Pending, Confirmed, Cancelled).	Listing Composer modal for fast property uploads.

Step-3: Idea Prioritization


Place your ideas on the matrix below to prioritize which ones are to be implemented based on Impact and Feasibility.
